

# Product Notice 156

## Part Number Changes for AudioCodes Mediant 1000B Survivable Branch Appliance (SBA)

**Notice Type:**

This Product Notice is **External**.

**Notice Subject:**

AudioCodes Mediant 1000B and Mediant 800 Survivable Branch Appliances are being shipped until today under the MSBG product family, while the data routing option was enabled by default in the SBA. In order to simply the configuration, the SBA will be shipped from now on with the data routing functionality disabled.

**Notice Date:**

July 2012

**Notice Effective Date:**

Immediately

**Notice Details:**

- AudioCodes Mediant 1000B and Mediant 800 Survivable Branch Appliance are being shipped until today under the MSBG product family, while the data routing option was enabled by default in the SBA. In order to simply the configuration, the SBA will be shipped from now on with the data router functionality disabled.
- The Mediant 1000B SBA part number will be modified, and the text “MSBG” will be removed (see affected part numbers in table below). This coming price book release will include the modified part numbers.
- All documents have been reviewed to make sure that disabling the data routing part of the SBA will not affect the installation.
- Customers who require data routing functionality can enable the capability, by ordering the following software key part numbers:
  - SW/M800/MSBG-UP
  - SW/M1K/MSBG-UP

- Mediant 800 SBA, which includes by default, access technology such as T1 WAN, is not covered by this product notice, and will continue to be shipped with the data routing capabilities enabled until further notice.
