

Product Notice No.: 0157

Upgrading to SPS version to 2.44.13 or higher - SPS Automatically Recover

Notice Type:

This Product Notice is **External**

Notice Subject:

SPS version 2.44.13 or higher supports automatic Lync recover in case of Lync server failure.

Notice Date:

August 9, 2012

Notice Effective Date:

August 9, 2012

Notice Details:

In older version of SPS the installation procedure for SPS installed in branches (i.e. SBA) was to do the following:

- Trusted application pool and endpoint homed on the SBA (Activate command).
- Define on the SPS Web Admin to work directly towards the SBA.

When upgrading to the new SPS version need to discard the above:

- Need to deactivate SPS and after it to Activate SPS but this time select Trusted application pool and endpoint homed on the **Lync FE** pool and not SBA.
- On the SPS Web Admin GUI clear the SBA FQDN from the Lync server under SPS General Settings.
- Reset the SPS core

Affected Product Family:

SPS

MobilityPLUS for Lync
