Notice Date:

December 23, 2012.

Notice Effective Date:

December 23, 2012.

Notice Details:

AudioCodes has officially released Version 6.6 for GA, supported by the previously mentioned affected products. This software release package (including documentation such as Release Notes, Hardware Manuals, and User Manuals) is located on AudioCodes Web site at http://www.audiocodes.com/downloads.

Software upgrade to Version 6.6 is available to customers and is offered for free to customers that have purchased AudioCodes Enhanced Support package.

Version 6.6 contains many new enhancements and features. Some of the feature highlights are listed below; a complete list of the new features is provided in the Release Notes:

■ Redirect service for "zero" configuration of newly deployed, non-configured MSBR devices

■ Wi-Fi support on Mediant 800 MSBR

■ Expanded PSTN capacity from single E1/T1 span to dual E1/T1 span on Mediant 800

■ SBC transcoding support and increased SBC session capacity on Mediant 4000

■ SBC session capacity increase from 60 to 120 on Mediant 1000B for Lync Enhanced Gateway deployments

■ Enhanced SIP terminations for SBC, offering increased interoperability capabilities

■ Introduction of the new Mediant 850 MSBR product, offering branch router (with WAN redundancy) functionalities and targeted at small medium enterprises (SME)
