

Product Notice No. 170

Release of AudioCodes Management Pack for Microsoft® SCOM 2012

Notice Audience:

This Product Notice is **external**.

Notice Subject:

Release announcement for AudioCodes Management Pack plug-in for Microsoft® System Center 2012 Operations Manager.

Notice Date:

February 12, 2013.

Notice Effective Date:

February 12, 2013.

Notice Details:

This Product Notice announces the release of AudioCodes *Management Pack* plug-in support for Microsoft System Center 2012 Operations Manager (SCOM 2012).

SCOM 2012 enables the monitoring of services, devices, and operations for many computers in a single console. Operators can gain rapid insight into the state of the IT environment and the IT services running across different systems and workloads by using numerous views that show state, health, and performance information, as well as alerts generated for availability, performance, configuration and security situations. When deploying Microsoft Lync™, the SCOM 2012 server is implemented to monitor the Lync infrastructure.

AudioCodes' specially designed *Management Pack* plug-in for SCOM 2012 enables the user to discover, monitor, and accurately depict the status of AudioCodes Enhanced Gateways, Session Border Controllers (SBC), and Survivable Branch Appliances (SBA).

The documentation and software of AudioCodes SCOM 2012 Management Pack are available on AudioCodes Web site under the Microsoft page (requires Web user login) at <http://www.audiocodes.com/solutions/microsoft/management-tools>. Please read the documentation to learn about the new Management Pack's capabilities.
