

Product Notice #0286

Wi-Fi Chipset Replacement for AudioCodes Mediant™ 800B MSBR

Notice Subject

The Wi-Fi chipset on AudioCodes Mediant 800B MSBR has reached End-of-Life (EOL) and has been replaced by a different Wi-Fi chipset.

Notice Date

March 2016

Notice Effective Date

Immediate

Affected Product Family

- Mediant 800B MSBR

Notice Details

This Product Notice is an official announcement by AudioCodes that the Wi-Fi chipset used by Mediant 800B MSBR has reached End-of-Life (EOL), as declared by its manufacturer. AudioCodes has replaced it with a different Wi-Fi chipset (which is also used by Mediant 500L MSBR).

From March 2016, all new orders for Mediant 800B MSBR will be shipped with the new Wi-Fi chipset.

The new Wi-Fi chipset is compatible with **Software Version 6.80A.286.002** and later.

Note:

- All software versions support the old Wi-Fi chipset.
- The new Wi-Fi chipset does not support the 5-GHz frequency range and 3x3 MIMO. Even though Mediant 800B MSBR will still be shipped with three external antennas, only two of the antennas will be functional (i.e., supporting 2x2 MIMO).
