## Software Update for AudioCodes Mediant CCE Appliances Version 2.0.2

**Dear Partners and Customers,**

AudioCodes announces the release of Software Version 2.0.2 for its Mediant CCE Appliances.

**Some of the major features introduced in this version include:**

- New and advanced CCE install wizard that guides the installer through all the required CCE installation steps. The wizard does not require any PowerShell or manual scripting.
- Install wizard supports Standalone and HA CCE deployment types.
- Install wizard allows the import of a pre-created Edge certificate (PFX) or automatically creating a Certificate Signing Request (CSR) to be signed by a certificate authority (CA).
- Install wizard supports automatic certificate creation and signing between the Gateway/SBC and the CCE for secured media (TLS).
- Managing Office 365 PSTN sites and supporting the creation of new PSTN sites.
- Install wizard supports an easy-to-use tool to manage the OS and CCE online update settings (e.g. choosing between weekly or monthly updates).
- Install wizard automatically checks for newer CCE install wizard versions.
- Uninstall option to support clean installation on existing hardware.

For a complete list of the Version 2.0.2 features, refer to the *AudioCodes Mediant CCE Appliance Release Notes Ver. 2.0.2* document. Related software and documentation can be downloaded from AudioCodes' Website at [www.audiocodes.com/downloads](http://www.audiocodes.com/downloads).

Software updates are available to customers and are downloadable free of charge to customers who have purchased Support packages that include software updates (i.e., ACTS, CHAMPS, and Enhanced Support) for the relevant products.

**Affected Products:**

- Mediant 800 CCE Appliance
- Mediant Server CCE Appliance
