

Product Notice #0347

Release of One Voice Operations Center (OVOC) Version 7.6 for General Availability

We are pleased to announce the release of OVOC Software Version 7.6 (7.6.143) for General Availability (GA)!

This release includes many new exciting features as well as resolved constraints from previous releases. For a full description of the release, click [here](#) to download the *One Voice Operations Center Release Notes* from AudioCodes website.

The software for this release is available for download from AudioCodes' Services Portal at <https://services.audiocodes.com> (registered Customers only).

Major Features

- Support for managing the new AudioCodes product - User Management Pack (UMP)
- Enhanced integration with ARM, including:
 - Single Sign-On to the ARM user interface
 - Display of ARM alarms and events (including carrier-grade and alarm forwarding mechanisms)
- Faster opening of the SBC Call Details screen that displays Quality of Experience (QoE) and SIP Call Flow data, due to the introduction of a new Cassandra database for call storage
- Improved Topology and Geo Maps
- Forms and dialog boxes in OVOC now include color-coded error and modification indications as well as indications for mandatory fields
- Display of OVOC server information such as status of processes, HW and SW component information and more
- Support for zero-touch provisioning of non-Skype for Business Phones through the IP Phone Manager

Affected Products

One Voice Operations Center
