

Product Notice #0387

Release of One Voice Operations Center (OVOC) Version 7.8.1119 for General Availability

We are pleased to announce the release of OVOC Software Version 7.8.1000 (7.8.1119) for General Availability (GA)!

This release includes many new exciting features as well as resolved constraints from previous releases. For a full description of the release, click [here](#) to download the *OVOC Release Notes* from AudioCodes website.

The software for this release is available for download from AudioCodes Services Portal at <https://services.audiocodes.com> (registered customers only).

Major Features

- New AudioCodes Live Teams Cloud service - a managed service offered by AudioCodes for service providers to manage their Microsoft 365 (M365) tenants.
- Analytic API is a new option for accessing specially designed database views with selected data from the OVOC database for integration with third-party applications or for creating customized dashboards using Microsoft Power BI or any other analytics tool.
- A new “Privacy” mode has been enabled to hide user-specific personal data. This new mode enables service providers to support General Data Protection Regulation (GDPR) requirements for user privacy.
- AudioCodes Device Manager introduces a new Group Level Management of IP Phones that enables better control for the automatic provisioning (“Zero-touch”) process, by tailoring the provisioning of firmware and configuration files to specific groups and thereby, preventing misconfiguration of many system-wide phones.
- CentOS has been upgraded to Version 7.7 for the dedicated server platform and for all virtual/cloud platforms.

Affected Products

One Voice Operations Center
