## 2 New Features

This section lists the following new features added to the new version:

### 2.1 Support for Multiple Administrators

The system supports multiple 'sub-admin' users, each with their own permissions. This way, the super Administrator can assign administrative tasks to various people and limit their access to only the tasks they need to perform.

The system supports the following permission rights options:

- **None** – Cannot access specific settings pages
- **View Only** – Can view page settings but cannot change them
- **View & Write** – Can view and change specific page settings

### 2.2 Administrator Password Enforcement

The new version requires that the administrator password must be between 8-20 characters and should contain at least:

- one lower-case letter
- one upper case letter
- one digit
- one special character
