1 Introduction

This document describes the software version releases of AudioCodes' Meeting Insights. It describes the [new features](#) and [known constraints](#) per version.

2 What's New!

This section describes the new features per released version.

Version 2.1.0

- Meeting Insights for Teams released a completely new app for Teams Mobile. The mobile app runs on the Microsoft Teams client for Android and iOS operating systems. This new app supports video and meeting playback, slide navigation, taking recaps during meetings and much more.
- The following new tabs were added to the left navigation pane for both desktop and mobile apps, offering a better user experience when navigating between meetings:
 - All meetings – Lists all meeting recordings a user can access.
 - My meetings – Lists meeting recordings where the user was the owner or was invited to.
 - Shared with me – Lists meeting recordings that were shared with the user, even though the user was not invited to them.
 - Events – Lists meeting recordings that were shared with everyone in the organization.
- Meeting Insights now allows owners to activate full transcription during a meeting (by clicking a new icon in the recap panel).
- If Mia wasn't initially invited to a scheduled meeting, users can now add Mia ad-hoc during the meeting in Teams Desktop.
- Mia can now be automatically added to all users' meetings (as an owner).
- For recurring meetings, the recap of all previous meetings in the series can now be displayed during the meeting to all participants.
- Trimming a video/meeting can now be accurately done by specifying the exact time for start and/or stop.
- Meeting Insights now supports Microsoft's Co-organizer feature. When a meeting organizer schedules a meeting in Outlook and invites another user as a "co-organizer", Meeting Insights automatically assigns this user with "can edit" privileges. (Some limitations apply for owners that have "compliance recording" enabled.)
- Meeting Insights can now integrate with Microsoft Planner, allowing users to send action items taken by Meeting Insights to Planner and then continue managing these action items in Planner.
- Continual transcription improvements – Meeting Insights can now train the transcription engine to improve its transcription quality, by learning from recaps that were modified or fixed by the end user.

- By default, Meeting Insights now sends the user a weekly email with all action items assigned to the user and a weekly email with all action items that the user assigned to others. Users can disable this weekly notification in the Settings > Notifications page.
- A user can now access highlights that the user added in a meeting that was not published by the owner.

3 Known Constraints

This section lists the known constraints.

Table 3-1: Known Constraints

| Incident | Version Discovered | Description | Severity |
|-----------|--------------------|--|----------|
| MREC-7260 | 2.1.0.50057 | When viewing a recurring meeting list, a user can view former meetings, but clicking them will open an incorrect meeting. | Medium |
| MREC-7278 | 2.1.0.50056 | Meeting recordings can't be played in full-screen mode on Android devices. | Medium |
| MREC-7109 | 2.1.0.49081 | Some issues may be experienced with playing specific meeting recordings on iPhone devices. | High |
| MREC-7113 | 2.1.0.49076 | In certain scenarios, the search functionality doesn't display all results. | Medium |
| MREC-7098 | 2.1.0.49064 | In certain scenarios, the Live Panel "freezes". Closing it and then re-opening it resolves the issue (Meeting Insights Mia is not affected.) | Medium |
